

Rievent Connect Features

A comprehensive list of Rievent Connect's features for CE providers and learners.

Primary Features

- ✓ **Connects to Your Existing Website:** Continue delivering content the same way you do today. Rievent Connect adds CE activities and learner self-service features to your website, content management system, or publishing platform.
- ✓ **Cloud-based Web Application:** Rievent Connect is a SaaS integration for your existing content delivery platform – no downloads, plugins, or installations are required.
- ✓ **Consistent Learner Experience:** Since Rievent Connect coexists with your branded website, learners never feel like they're using a separate system.
- ✓ **Support for All Professions:** Manage and deliver online continuing professional education activities for any profession, including medical, legal, accounting, and financial professions.
- ✓ **Maintenance of Certification (MOC) Support:** Create and deliver MOC points using Rievent's Certification Management Tool. Learners can claim MOC points for any qualifying activities.
- ✓ **Automated MOC Fulfillment:** When a learner requests MOC credit, a real-time web service integration with the ACCME automatically transmits and verifies MOC points with the ACCME collaborating medical board.
- ✓ **Single Sign-On Support:** Already using your own login and authentication system? Rievent can integrate with your existing single sign on system so your learners can continue using their same credentials.
- ✓ **Legacy Data Import:** Add existing learner and activity data to Rievent Connect and run reports on past performance.
- ✓ **24/7 Website, Application, and Server Monitoring:** Rievent Connect runs on state-of-the-art, Amazon Web Services for maximum uptime.

Administrative Features

- ✓ **Online Administrative Portal:** Create, manage, and report on your activities, all in one place.
- ✓ **Unlimited Administrative Accounts:** Add as many administrators as you need to best serve your organization and your learners.
- ✓ **Role-based Administrative Access:** Add administrators with custom roles and granular permissions – great for providing complete access to some administrators and limited access to others.
- ✓ **Self Service Data Importer:** Upload learner profiles and participation data, including registration, completion, and credit data.
- ✓ **Certification Management Tool:** Create and manage all credit types, accredited providers, and certificates. The Certification Management Tool includes support for Maintenance of Certification (MOC).
- ✓ **Learner Account Access:** View any learner's activity history or data with just a few clicks. You can also merge learner accounts, resend purchase receipts, edit profiles, and print transcripts.
- ✓ **Data Entry Support:** While Rievent Connect keeps manual operations to an absolute minimum, you can always add activity data on demand.

- ✓ **Document Storage:** Need to upload activity-related documentation? You can store all of it inside Rievent Connect.
- ✓ **Online Ticketing and Support Portal:** Resources include how-to guides, instructional videos, frequently asked questions and more.

Learner Features

- ✓ **CE Activities On-Demand:** Learners log in to you existing platform and complete CE activities whenever they want.
- ✓ **Seamless Visual Integration:** Rievent Connect integrates with your existing content delivery platform, so there's no learning curve for learners.
- ✓ **Mobile-Responsive Design:** Learners access CE activities from any device and enjoy the same seamless experience. Smartphones, tablets, desktop computers, laptops – whatever they already use to view your content.
- ✓ **Searchable CE Catalog and Events Calendar:** It's easy to browse and select activities with the CE Catalog and Events Calendar. Learners can filter search results to identify the most relevant activities and quickly find upcoming events.
- ✓ **MyCE Page:** Complete access to learning history, certificates, and transcripts means learners won't have to ask for those things. It's all available in Rievent.
- ✓ **Print Custom Transcripts:** When learners need transcripts, they can access and print them themselves.
- ✓ **Data for Completed Activities:** Any time learners want to review test scores or content for completed activities, they simply log in and access it on demand.
- ✓ **Profile Access:** Learners can update their own profile data, modify contact information, and reset their own passwords.

Activity Creation

- ✓ **Production Templates:** Powerful tools enable creation and publishing of activities – no programming skills required.
- ✓ **Tests and Evaluations:** Add pre-tests, pre-surveys, post-tests, post-activity evaluations/surveys, and follow-up outcomes surveys to any activity.
- ✓ **Question Types:** Add multiple choice, rating, drop-down, text entry, numeric input, date input, and currency input question types. Rievent Connect also supports test hints and rationales.
- ✓ **Peer Response Comparison:** Enable learners to see how their evaluation and test responses compare to the responses of peers.
- ✓ **Multiple Choice Parser:** Easily copy and paste a group of multiple choice or true/false questions into an evaluation.
- ✓ **Easy-to-Use Authoring Tools:** An intuitive interface makes it simple to add formatting, images, tables, and links to evaluations, tests, and overview pages. An optional source code view allows you to add HTML customizations.
- ✓ **Credit Types and Accredited Providers:** Add one or multiple credit types when you create an activity. Rievent also supports all ACCME-collaborating medical boards for Maintenance of Certification (MOC) credit.

Reporting

- ✓ **Real-time Data Access:** Watch learner actions unfold in real time. With Rievent Connect reporting, you can view up-to-the-minute data for every activity.
- ✓ **Standard Reports Library:** Extensive reports include detailed metrics for participation, tests, and evaluations.
- ✓ **ACCME-Compliant Reporting:** Automatically generate ACCME PARS reports and export them to TSV format for easy editing. You're ready to upload the file directly into PARS.
- ✓ **Dedicated ACCME PARS Interface:** Rievent Connect automatically tracks and maintains data related to PARS so you don't have to. A dedicated PARS page allows you to add other data like financials, activity design characteristics, and learning competencies.
- ✓ **Detailed Financial Reports:** Generate reports on product purchases, discount codes, and purchases by participant type.
- ✓ **Flexible Filtering Tools:** Create custom, exportable reports using multiple dynamic criteria.
- ✓ **Individual or Aggregate Reporting:** View reports for a single activity or multiple activities in aggregate. Aggregate viewing helps you compare performance across activities.
- ✓ **Spreadsheet Exports:** Need to save or forward your reports as spreadsheets? You can export any report to CSV format with just a few clicks.

CE Activity Types

- ✓ **Online Enduring Materials:** Create enduring activities with a full range of options for content, credit, surveys, tests, outcomes, and more.
- ✓ **Journal-Based:** Upload any journal content or link to journal articles anywhere on the Web.
